

WORKSHOP GUIDE

Decision Center Workshop

Design a living leadership system, not a dashboard

Outcome-Driven Management

Purpose

Establish a leadership system that connects evidence and context to decisions, attention, resource alignment, and intervention.

Five decision domains

Strategic Outcomes Business objectives, customer outcomes, product goals, strategic initiatives.	Execution Health Delivery predictability, milestone progress, dependencies, capacity.
Engineering Excellence Quality, reliability, technical debt, platform health.	Customer Signals Adoption, satisfaction, escalations, incidents, feedback.
Organizational Effectiveness Team health, talent development, cross-functional alignment, operational efficiency.	

Review design

Before Prepare only the signals that clarify outcome health, risk, tradeoffs, or decisions.
During Interpret evidence, identify obstacles, make choices, assign owners, and align resources.
After Record decisions, actions, rationale, expected evidence, and next review point.

Avoid

Status meeting Do not spend the review narrating completed activity.	Reporting layer Do not add data that does not inform understanding or action.
Governance theater Do not end without an explicit decision or next evidence.	

Use note

This is a proposed ODM resource and discussion aid. Adapt it to context. It is not a certification, validated benchmark, or substitute for organizational policy.
