

ADOPTION TOOL

ODM Assessment Worksheet

A discussion aid for identifying the next improvement bet

Outcome-Driven Management

How to use this worksheet

Score each statement from 1 to 4: 1 = Rarely true, 2 = Sometimes true, 3 = Often true, 4 = Consistently true.
Assess observable behavior rather than aspiration.

Outcomes	1	2	3	4
Teams can explain the measurable outcome they support.	■	■	■	■
Reviews distinguish activity from value created.	■	■	■	■
Outcome indicators are explicit.	■	■	■	■

Bets	1	2	3	4
Investments state the belief connecting action to outcome.	■	■	■	■
Bets are bounded and have review points.	■	■	■	■
Unsupported bets can be adapted or stopped.	■	■	■	■

Evidence	1	2	3	4
Actionable signals are prioritized over volume.	■	■	■	■
Multiple evidence domains are considered together.	■	■	■	■
Evidence changes decisions.	■	■	■	■

Learning Loops	1	2	3	4
Experiments answer important questions.	■	■	■	■
Feedback arrives in time to influence action.	■	■	■	■
Learning is captured and reused.	■	■	■	■

Decisions	1	2	3	4
Decision ownership is clear.	■	■	■	■

Decisions	1	2	3	4
Reviews end with explicit choices.	■	■	■	■
Decision latency is visible.	■	■	■	■

Engineering	1	2	3	4
Engineering includes value, velocity, quality, and trust.	■	■	■	■
Engineering signals connect to outcomes.	■	■	■	■
Quality and trust enable sustained value.	■	■	■	■

Leadership	1	2	3	4
Leaders maintain situational awareness.	■	■	■	■
Reviews focus on risks, tradeoffs, obstacles, and decisions.	■	■	■	■
Priorities, dependencies, and decisions are transparent.	■	■	■	■

Reflection

Which dimension is weakest? What single improvement bet would create the most useful learning? What evidence will indicate whether behavior changed?

Use note

This is a proposed ODM resource and discussion aid. Adapt it to context. It is not a certification, validated benchmark, or substitute for organizational policy.
